AUDITOR'S BIENNIAL REPORT.

AUDITOR'S OFFICE,
December 31, 1889.

To His Excellency, Governor Robert Lowry:

I have the honor to submit to you, and through you to the Legislature, the accompanying detailed report of transactions had at this office, on the various accounts therein named, for the fiscal years 1888 and 1889, beginning on 1st day of January, and ending 31st December, respectively.

As in my former report, so in this, I note each warrant by number, date and name, both on Receipt and Disbursement account, and in suitable tables, make exhibit of disbursements to the various beneficiaries entitled thereto under the law and appropriation Acts, and of the receipts from the various sources provided by the Revenue Acts.

It will be observed by reference to proper tables, that the assessed values, real and personal in 1888, were $133,706,779; in 1889 were $158,000,000 in round numbers. The Real Roll of Marion county not yet received.

Yielding, in 1888.....$433,285.74
And yielding in 1889..... 533,098.34

All receipts from this source in 1888 up to 1st October were under the old levy of 3½ mills, while the total of 1889 were under the 4 mill levy.

Collected in 1888	from Privileges.....	$194,503.83
" " 1889	from Privileges.....	225,598.80
" " 1888	from License to Retail	130,307.67
" " 1889	from License to Retail	152,500.00
" " 1888	from Land Purchases and R..	27,151.74
" " 1889	from Land Purchases and R..	6,223.81
" " 1888	from Chickasaw School L'd..	6,334.32
" " 1889	from Chickasaw School L'd...	6,472.46
" " 1888	from R. R. Tax.....	139,825.72
" " 1889	from R. R. Tax.....	151,506.62

The collections in 1888 from all sources exceed the disbursements.....$23,178.46

Those in 1889 exceeded disbursements to the amount of.....$250,425.44

The foregoing constitute the sources of revenue provided by law. There are others, however, which will be noted, but are mainly incidental. It will be observed that there was paid into the Treasury on account of 2 and 3 per cent. fund in 1888 the sum of $65,422.06. This was the accumulation in U. S. Treasury of the State's dividend or share of all U. S. land sales in Mississippi for a number of years preceding, and secured by your Excellency. As directed by the Legislature, this, with former collections from the same source, amounting to $78,429.05 in the aggregate, was distributed to the various counties through presidents of boards of supervisors for school-house purposes.

The last Legislature passed a new law in relation to assessment of realty. This law has been of great benefit generally, and only needs a few changes in unimportant features to render it more practical in execution, and I have no hesitancy in stating that, in the hands of competent assessors, it will prove a success and demonstrate its own utility in equalizing assessments throughout the State. I must be pardoned for saying, that many of the rolls of counties demonstrate the fact that the assessment of property is in the hands of men grossly incompetent.

The inspection of rolls by legislators is invited, and respectfully urged. I find that great jealousy exists over this matter of assessment between counties, and the law seems purposely ignored; hence, I beg to suggest, that to equalize assessments in a manner at all fairly and just, in my judgment, a State Board of Equalizers will have to be created, with power to traverse the rolls, note all failures to comply with the law in making perfect rolls, and return the same for correction and changes when needed.

Too little attention is manifestly paid by boards of supervisors to this matter, in passing upon rolls for final acceptance. The rolls themselves evidence gross neglect or unpardonable ignorance of the requirements of law on the part of boards supervisors. In fact, so much can be said and so many are the evils that underlie this, the ground-work of our revenue system, that I would suggest the raising of a committee to devise and report some remedy.

Assessors are really hard worked and poorly paid. Hence but few of the really capable are willing to take the office. Better pay should be provided and a better qualified officer demanded, even though a test of competency were required. The office is one that the average elector seems to think can be filled by any "*clever*, poor and needy citizen." No greater mistake can be made. Upon his work depends 40 per cent.

of our revenue, and out of it grows largely the just complaint of unequal taxation. If possible, do away with incompetent assessors.

INSURANCE.

Mississippi is one of the few States that have no system of Insurance Reports and Statistics. I am constantly receiving inquiries for such matter from Commissioners from other States. The amount of business done, the number of persons interested in all questions affecting Insurance affairs, the number of companies (foreign and local) doing business in the State, and very frequent complaint against insurance management, lead me to suggest that simple justice to both *insured* and *insurer* demands that something be done which will lead to a general enlightenment on this subject.

BANKS.

The last Legislature made it the duty of the Auditor to require all State and private banks to report to this office four times annually, all matters affecting their capital, stock and transactions, and publish same. This duty has been performed. For the benefit of all concerned, I have compiled a table showing the condition and transactions of the banks from their statements made 30th day of November last, and I respectfully invite your consideration of the same. Only a few years since, Mississippi had no banks, except in a half dozen towns, and as was notorious all surplus money in hands of individuals was deposited outside of the State, to the manifest and serious detriment of the business interests of the people at large. Now there is scarcely a town of any business reputation that has not from one to four banks, affording facilities for persons in all lines of business, which otherwise were impossible. The existence and multiplicity of banks have cheapened to the *consumer* every article bought and sold in his vicinity. They have not only made the local cotton buyer a possibility in every town, saving the necessity of intermediaries, and the expense incident thereto, and in many other ways afforded cheapening facilities for business transactions, but, by their presence, confidence between man and man is built up, properties which, heretofore, have only been valuable to mortgage for supplies, at large and ruinous profits to merchants, are now a basis of collateral at the banks, enabling many persons to resume cash payments for purchases and at a moderate rate of interest. The establishment of banking institutions, I am persuaded, tends to the reduction of interest and I should deem all legislation wise, and for the benefit of the masses that looked to the cheapening of money (which simply means

making it abundant) by encouraging the introduction of foreign capital into the State and the keeping at home of our own surplus for domestic use and investment. There are now forty-one banks operating under State laws, and twelve National banks with a total capital of $3,600,145 97. Most of them have been organized within the last three or four years, as will be seen by reference to statement furnished herein and many within the last year, and they continue to multiply.

STATISTICS.

The necessity from a business stand-point for a department for the collection of statistical information relating to the State's material interests has been suggested to me by many of the most progressive business men in the State, and the newspapers in some of the most progressive business centers have urged with sound reason the propriety and necessity of some legislation on this subject. The eye of the outside world is on Mississippi as a field for investment in land for cultivation and in manufactories, and I am constantly appealed to for information touching the State's resources, which I cannot furnish. I am persuaded that a system for collecting statistical information could be devised that would be of great value and at little expense to the State.

TAX LANDS.

At the time of my induction into office the records of tax lands showed holdings under forfeiture for taxes of nearly one million acres. Inspection of the records on December 31, 1889, shows that there is in the Hill Counties 213,000 acres, and in the Delta 57,000 acres, making a total of, in round numbers, 270,000 acres. These constitute the remainder of that vast area reaching into the millions forfeited prior to 1880 and not redeemed. It is safe to conclude, moreover, that of the present holdings nearly or quite one-third are improperly held for various reasons, and should be stricken from the records. This is being done daily, and as evidence is produced showing the errors in sales to the State, as is now provided by law.

The rapidity of sales of these lands to individuals, and the ever-increasing demand for them point with great emphasis to the fact that lands are enhancing in value and are no longer an incubus, as has been so long felt by owners. Nor are tax-collectors now reporting sales for non-payment of taxes. In fine, our lands have a substantial value which will account for the large increase of $25,000,000 in values of real estate, as shown by late assessments.

PRIVILEGES.

As indicated above a large per centage of revenue is de-

rived from privilege taxes, and an itemized showing of the whole "privilege" receipts is made on "folder" to which special attention is requested. It will be noted that many items produce but very little revenue and should not be required, as it only increases the labor of tax-collectors with no corresponding benefits. Express companies are no longer liable, under a late decision of the United States Supreme Court. Many changes in the present law could be made to great advantage, and I shall take a pleasure in pointing to the proper committee, such as appear advisable.

YAZOO AND MISSISSIPPI DELTA LEVEE BOARD.

Attention is respectfully called to the fact that under the act creating the Yazoo and Mississippi Delta Levee Board, the collection of its revenues is made in the same manner as the State taxes, through this office. In 1886 the method of payment into its State Treasury, (the State Treasurer being treasurer of the Levee Board) was so modified as to require the keeping of distinct and separate account, entailing upon the Auditor a vastly increased amount of labor and responsibility and individual expense. For four years this labor has been performed, and no compensation allowed or paid except for 1888 and 1889, and I learn that the board at a recent session decided not to allow any compensation for the future.

The Auditor is a State officer, elected for the purpose of attending to certain duties for the State, prescribed by law, for which the State fixes and pays such compensation as the Legislature judges to be proper. This Levee Board is simply a private corporation, a creation of the Legislature, as much so as a railroad or other corporation in the State, for which it would be quite as just and proper to require the Auditor to work as for this Levee Board without compensation. Again, the Levee Board changed the treasury recently from the State Treasury to a domicile in Clarksdale, Mississippi. This increases largely the labor of the Auditor, and requires an increase of care and responsibility. In view of this state of facts, briefly stated, I submit, is it not reasonable that the Legislature should *require* by special act, this Levee Board to pay the Auditor $1,000.00 per annum for services, or change its revenue law, relieving the Auditor of this gratuitous work for a corporation amply able to pay for the service needed for its own private ends. I hope this matter will not fail of prompt and affirmative action.

OFFICIAL MAP.

Attention is called to the fact that the last official map of the State was made in 1871. Since which time several new counties have been formed and do not appear thereon.

Many changes have been made and statistical features developed which should be shown on an official map. An accurate and complete map is very essential to an intelligent attention to the Revenue Department of the State. This office is without official or reliable knowledge of the railroad mileage in the State, the exact area of each county or the population of the various cities and towns within them, which should be shown for this decennial year.

ENUMERATION OF EDUCABLE CHILDREN.

This is the year under the law for enumerating the educable children. In doing this it will serve a good purpose to make some changes and modifications in the present law. For this purpose your attention is respectfully called to the matter At present this is done under direction of the Auditor to whom report is made. In my judgment it would be best to give its direction in charge of the Superintendent of Education. Let him be required to furnish this office with a condensed, tabulated statement of the enumeration by counties as a basis of school fund distribution. Thus the Superintendent's office will retain the itemized report; a valuable and proper statistic for his department.

TAX-COLLECTORS' COMMISSIONS.

At present the commissions allowed to tax-collectors on account of "license to retail" is only two per cent., to be paid by the licensee. The same labor and responsibility attaches to this duty as to all others, and there can be no good reason for not allowing 5 per cent. commissions, to be paid as now provided. In fact, 10 per cent. would not be too much, in my judgment. The present commission is totally inadequate as compensation for the service rendered. It is difficult to conceive why this discrimination should have ever been made, and more especially since it is not deducted from the sum collected, which goes altogether to the credit of the school fund.

Again, tax-collectors in the Yazoo-Mississippi Delta Levee District only receive for their labor 3 per cent. commissions. It would be but just to them to increase this amount to 5 per cent., at least for the first $10,000 of collections. In all river front counties and those bordering on and lying partly in the hills, the task is difficult, labors multiplied and responsibilities greatly increased.

FINES AND FORFEITURES.

Under the present system all "fines and forfeitures" are retained in the counties where imposed and collected, the chancery clerks are required to report same to the Auditor

semi-annually and the amounts so reported are deducted from the county's pro rata share of distributive school fund.

I am persuaded that these collections should be paid into the State Treasury as other revenues are, to be distributed through the regular channel. This would save labor necessary under the present system and enable a more prompt distribution of funds, for it is now difficult to command reports of these retentions promptly, which necessitates embarrassing delays in many instances, and attaches unwarranted blame to this office.

Code 1880, section 507, allows the boards of supervisors, for certain causes therein enumerated, to change the work of the assessor at any time. The too free exercise of this authority produces absolute mutilation of the rolls and causes untold confusion to tax-collectors and the Auditor in final settlements. This section should be so amended as to prohibit the making of any changes on rolls after their acceptance by the boards of supervisors until the first day of the following March. This need work no hardship, for boards of supervisors can, in making allowances at time of final settlement, pass such orders as will relieve the parties aggrieved and credit the tax-collectors with the errors or excessive charges complained of, and certify at that date all proper changes on the roll in one order. Again, the frequency of changes demonstrate either the incompetency of assessors or that boards of supervisors act in an ex-parte manner, both of which are reprehensible and should be abated as bad official practice.

TABULATED STATEMENT OF LAND ASSESSMENTS FOR 1889.

Under "An Act to equalize assessments in the different counties of the State," approved March 8, 1888, the land has been assessed in the different counties; and with much labor and care the results have been tabulated in this office, showing the same under the following headings: Number acres cleared lands; approximated average value per acre of cleared lands; total value cleared lands, including incorporated cities and towns; number acres of uncleared lands; approximated average value per acre of uncleared lands; total value of uncleared lands; total value of both cleared and uncleared lands; number acres of lands assessed to State; approximated average value per acre of lands assessed to State; approximated average value per acre cleared, uncleared and lands assessed to State; number acres of vacant lands (not taxable); number acres of school lands (not taxable); total acreage in county; total valuation of all the assessable lands and improvements in the county, and amount of State tax for 1889, on all assessable lands and improvements in county at four

mills. This table, of course, is incomplete in many respects, owing to the fact that the rolls in many of the counties were not prepared in strict accordance with the act under which they were made (and some of them, I regret to say, show up very badly;)—one county, Marion, is left out entirely. The incorporated cities and towns in many of the rolls are not separated from the other assessments in the body of the rolls, besides a great many other defects, thereby rendering it impossible to do more than make an approximated estimate of average values, etc. Yet, with all these difficulties to contend with, much valuable information may be obtained by a careful perusal of the contents of this "Tabulated Statement of Land Assessments for 1889," which appears in this report, and to which special attention is directed.

I trust that this report will throw sufficient light upon every feature and item of transactions in this office relating to the State's fiscal affairs during the last two years, to render easy a thorough and intelligent comprehension of the same by those who are least expert in matters relating to accounts.

The affairs of the office are ready for your inspection.

Respectfully submitted.

W. W. STONE,
Auditor Public Accounts

DOCUMENT I.—Continued.

YAZOO AND MISSISSIPPI VALLEY RAILROAD COMPANY.

This Railroad Company having refused to pay either a privilege or advalorem tax, claiming exemption under its charter, the Legislature of 1888 passed "An Act to provide for the assessment and collection of past due and unpaid taxes on railroads which have escaped the payment thereof." See Chapter 28, Acts of 1888. Under this Act the assessment of the road was made in 1888, by the Tax Collectors of the different counties through which the road runs, for "past due and unpaid taxes," and the valuations of the same having been properly corrected and equalized by the Railroad Commission, the Railroad Company demurred to the assessment as made and approved by the Railroad Commission, and appealed successively to the Circuit Court of the first district of Hinds county, the State Supreme Court, and to the Supreme Court of the United States, where the decision of the courts below was sustained and judgment rendered in September last against the Railroad Company. This judgment being final and conclusive, the Tax Collectors in the different counties through which the road runs proceeded to make the proper collections, the following having reported and paid into the State Treasury the amount of State tax so collected, viz:

Holmes	$2,693 75
Madison	1,559 73

Yazoo has reported $4,717.84 collected on State tax, but the report came in too late to be paid into the State Treasury for this year. The Tax Collectors of the other counties have doubtless made their collections and will make payment into the State Treasury early in January, 1890.

The State taxes of 1888 have been collected by the Tax Collector of Hinds county, as provided in Sections 599 to 605 inclusive, Code of 1880; together with the Act of 1888, as quoted above, and the net amount of $6,452.10 paid into the State Treasury.

The State taxes 1889 have been collected under Sections 599 to 605 inclusive, Code of 1880; Chapter 28, Acts of 1888; and "An Act incorporating the Yazoo and Mississippi Valley Railroad Company and declaring its powers," approved February 17, 1882. The State and County Taxes

DOCUMENT I—Continued.

have both been paid *direct* through this office into the State Treasury by Railroad Company, the amount of which is as follows:

State tax	$ 7,341.44
County tax	14,734.92
Total tax	$ 22,076.36

No provision having been made for the disposition of this payment, it remains in the State Treasury to the credit of the General Fund, to be disposed of as the Legislature may direct.
